

UX Strategy Blueprint

Challenges

What problems are you trying to solve?

Fragmented documentation

Information is scattered across systems and hard to find.

Difficult spare-part identification

Hard to find the right part and verify compatibility.

Limited request visibility

Customers can't easily track status or history of requests.

Slow support processes

Manual handoffs and inefficient workflows cause delays.

Aspirations

What are the ideal desired outcomes?
What do you want to achieve?

Reduce downtime

Help customers solve issues faster and keep operations running.

Create best-in-class self-service portal

Deliver an intuitive, modern experience customers love.

Increase customer confidence

Make information reliable, accurate and easy to trust.

Improve operational efficiency

Streamline processes and reduce support workload.

Focus Areas

What is the scope of the strategy?
What will you focus on for the most impact?

WHO WE SERVE

Maintenance Technicians

Buyers

Plant Managers

Service Coordinators

WHAT WE FOCUS ON

Documentation

Parts

Service Requests

Tracking & Visibility

Guiding Principles

How will you overcome the challenges?
What specific mantras will guide teams?

Self-service first

Empower customers to find answers and solve on their own.

Transparency

Clear visibility into status, information and communication.

Task-focused design

Design around user tasks and real-world workflows.

Progressive disclosure

Show what's needed, when it's needed.

One source of truth

Single, trusted and up-to-date information across the portal.

Activities

What types of activities solve the problems? What capabilities achieve your aspirations?

User research

Understand users, tasks, pain points and needs.

Personas

Define user types, goals and key scenarios.

Journey mapping

Map end-to-end customer/user journeys and pain points.

Information architecture

Design intuitive structure and navigation.

Usability testing

Validate designs and improve the experience iteratively.

Analytics & insights

Measure behavior and uncover opportunities.

Service blueprinting

Align people, processes and systems to deliver the experience.

Measurements

What types of measurements we will you employ? What metrics will be used to gauge success?

Task success rate

% of tasks completed successfully by users.

Self-service resolution rate

% of issues resolved without support intervention.

RFQ-to-order conversion

% of RFQs that convert to orders.

Request resolution time

Average time to resolve service requests.

Customer satisfaction

CSAT score from surveys and feedback.

STRATEGY VISION: Empower Emhart Glass customers with a unified, intelligent self-service portal that reduces downtime, builds confidence and drives operational excellence.
